Some Quick Gutter Improvement Ideas That Bring BIG Results

Have you thought about where water from your gutters ends up?

Moving water away from the foundation can be attractive, permanent, cost-effective and will make a big difference.

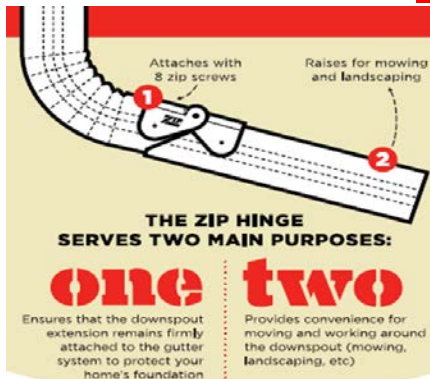

Standard rain gutter systems have downspout pipes that bring the water from the gutter to the ground area and disperse it a few inches away from the foundation of the house. With proper grading sloped away from the house, this can work just fine. However, often there are flower beds from which soil and mulch get washed away, or the water flows right onto walking surfaces which in winter results in hazardous ice conditions. Lastly, any large amount of water that is spilled at the base of the foundation will eventually cause foundation and basement moisture problems.

The solution can be a Pop-up Emitter as shown here

Another Solution can be a Zip Hinge® as shown here

Replace corny plastic accessories with the long lasting adjustable Zip Hinge® that allows you to move the downspout extension out of the way when you are working in the flower bed or cutting your lawn.

Exterior Gutter Cleaning may be an inexpensive alternative to painting or replacement.

If your whole house is covered with moss, mildew and ground-in dirt from the atmosphere, powerwashing may be the best solution. However, if "tiger striping" affects the look of your gutters, then manual cleaning of the gutters and downspouts using a safe professional grade cleaner may be the way to go. **MAKE OLDER GUTTERS LOOK LIKE NEW.** This is recommended about every 2-4 years and is usually done in early spring or mid-summer. Ask now about pricing and scheduling and our no cost reminder service.

Outdoor Spotlight Bulb Replacement

Let us change burnt-out exterior bulbs safely & conveniently! Simply supply us with the bulb(s) of your choice and we can install them for a nominal fee. Save the minimum service charge (\$75) by asking us to do this while we are already there doing your gutter cleaning or repair. \$15 charge for first bulb with additional bulbs only \$10 each.
